Abt's Capabilities in Youth Empowerment

Workforce Development

Increasing workforce opportunities for disadvantaged youth; promoting and evaluating programs that create healthy work environments.

Enterprise Development

Working with local governments and communities to decrease youth poverty through affordable housing, better schools, health services and more sustainable environments.

Financial Inclusion

Promoting the economic stabilization of low-, moderate-, and middle-income youth and their families through extensive research and evaluation programs.

Gender

Enforcing programs that prioritize equal workplace opportunities for female youth, as well as worldwide health programs that inform and empower young women.

Monitoring, Research and Evaluation/Learning

Designing and implementing MR&E/L programs to track progress; analyzing and applying critical learnings to ensure program success.

Health

Developing and executing healthcare programs in family planning/reproductive health, infectious diseases and mental health.

Abt is focused on what works. We develop innovative, evidence-based solutions to the challenges of job creation, training, health and family planning, with the goal of improving young people's quality of life and economic well-being worldwide.
